Dear Sirs/Mesdames:

Re: Additional Rent Increase Application for 8735 Selkirk Street, Vancouver, British Columbia (the "Building")

I am the President of WCC Water Conservation Company Limited ("WCC"). WCC provides water and energy saving fit up services for all types of properties, including multi-unit residential properties such as the Building. WCC has successfully completed thousands of water and energy saving fit up projects all across Canada.

WCC was contracted to supply toilets for all units in the Building with 3.0 L ultra high efficiency toilets. Included with the toilet replacements were new fixtures including new Pro Flow 3.0 lpf tanks, new round bowls, new round seats, new wax rings, new floor bolts, and new supply lines.

The existing toilets at the Building prior to the replacement were all 5.0 L and 6.0 L toilets which use more water and are less efficient compared to the replacement toilets.

The Landlord contacted WCC to supply the toilets to the Building to improve water usage and energy efficiency at the Building. The toilets at the Building were not replaced due to inadequate maintenance by the Landlord. It is anticipated that the work completed will have an estimated useful life of approximately 20 years. Aside from minor repair work, it is estimated that The Landlord will not need to undertake a similar project for at least 20 years.

I am aware this letter will be provided to the BC Residential Tenancy Branch by the Landlord to provide information to the tribunal with respect to the scope of the Project in support of the Landlord's application for an additional rent increase for the Building.

Sincerely,

Derek Waddell
President
WCC Water Conservation Company Limited
